No. 10 YUCCA gloriosa 'Variegata'

Description

•**Variegation of Leaf** - Creamy leaf margins. In the cooler months the plant will have visible pink to reddish overtones. Grows to about 5' in height by 4' in width.

•**Flowers** - Creamy white flowers in summer months that last for several weeks.

Outdoor Growth

•**Light** - Full sun
•**Water** - Low water needs, drought and heat tolerant.
DOES NOT LIKE WET "FEET".

Specimen product that will not form a trunk but will remain compact and form extra shoots. Slow growing and really tolerant of difficult growing situations: cold, heat, dry conditions and high sun areas.

•**Soil** - Well drained mix but a dry mix is best. pH is a bit acidic - 6.0.

Application

•**"Spanish Dagger"**. Great as a focal point in a landscape planting.
•**Soft Tips**
•**Good plant for abused areas.**
•**USDA Zones 6 - 9 Evergreen**
•**Native Southeast USA**
