

SIAM™ CURCUMA STAND OUT

at COSTA SPRING TRIALS 2011

A

Our Siam™ Series Curcuma really put on a show both in the trial beds and landscape plantings! Large flowers, bright colors, more compact growth habit.

All plugs are from Tissue Culture and must be booked now to ensure delivery in Spring 2012.

We are already sold out on certain varieties so please order as soon as possible!

SIAM™ CURCUMA:
Favorites at the Costa Trials

Curcuma (Siam Tulip) is native to Thailand and is a member of a family with an exotic name: Zingiberaceae! These striking Zone 10-11 plants are traditionally grown in the Spring from bulbs and require very high soil temperatures to sprout. Our tissue culture plugs enable growers to skip the sprouting step, substantially reduce the finish times, and produce these plants in Northern greenhouses for summer!
