

Red Abyssinian Banana

Ensete ventricosum 'Maurelii'

Fantastic exotic foliage - compact form - deep burgundy leaf - easy care

- Very richly colored cultivar of Ensete ventricosum and a *superb patio item for summer décor*.
- Undersides of leaves are flushed orange-red with the color of the midribs being especially intense. Upper surface of the leaves is variably flushed at the edges with a chocolate-brown color and, again, the midrib is very dark. Colors are somewhat less intense if the plant is grown in shade.
- Hardy to Zone 9.
- Available in C/P 50 - FOB Winter Garden, Florida.
