

PERENNIALS TRIAL

North Carolina State University 2011-2013

Perennials Planted in 2012

**FOREMOSTCO®
RESULTS**

**100%
SURVIVAL RATE!**

Rosa 'Sunrosa Red' rose

Company

Foremostco

Year Planted

2012

Height

12"

Spread

11"

Number Planted

9

Survival

100%

Comments

Disease resistant; low maintenance; small blossoms begin as coral colored buds; floriferous plant; mild fragrance.

PERENNIALS TRIAL REPORT EVALUATION

"The purpose of our perennials trial is to evaluate the plant material under conditions unique to our location. Our summer growing conditions are typically hot temperatures with high humidity. There is little nighttime temperature relief/recovery; average summer nighttime temperatures can be in the 70s. Irrigation is required all season. Plants were given a visual rating by the same person. The overall rating was based on plant performance and appearance, including floriferousness, plant size and shape, and freedom from insect and disease problems. The rating scale ranged from 1 (very poor) to 5 (excellent) with 0.5 unit increments possible; a 0 rating indicated that all plants of the cultivar trial died."
