# STROMANTHE SANGUINEA 'TRIOSTAR'

Landscape Zone 10

## FEATURES

- From vegetative cuttings
- Exotic variegated foliage of cream, green and pink
- Broad shiny leaves arranged in fans with burgundy-pink undersides
- Short creeping stems that usually reach between 18-30 inches in container

## PRODUCT USES

- As a houseplant
- An excellent ingredient for a combo patio pot
- As an alternative potted plant during the holidays due to their color
- 6-10" pots

## GROWING INFORMATION

- Ideal light level is 1,000-2,000 foot candles. Lower light levels improve leaf quality
- 68-86°F temperatures are best, and humidity levels of 60-80% are optimal
- Keep evenly moist; drying can cause tip burn

### AVAILABLE AS:

- ▶ Bare Root
- ▶ Clumps
